

Smart Scale Owner Operator & Fleet Onboard Truck Scales

Commercial trucking is not a faint of heart business. There are a lot of unknowns and cost risks! Our Smart Scale Onboard Truck Scale can help you:

- Eliminate Overweight Fines • Cut down on maintenance costs
- Load your truck/trailer to its maximum to maximize profit
- Reduce Tire replacement intervals • Extend the life of your truck/trailer
- Increase confidence of delivery customers that they receive what they paid for
- Validate that what you were sold is what was loaded onto your truck

Air Suspension Sensor

Low cost, patented solutions for vehicles with air suspensions that calculates accurate axle and gross vehicle weight readings in all weather conditions based on temperature and pressure change in the suspension.

Air Suspension Sensor

Low Cost

Great accuracy reading between 0.3-1% in all weather conditions

Accuracy

Great accuracy reading between 0.3-1% in all weather conditions

Long Range

Reliable monitoring up to 500 ft (155 m)

Easy Setup

Simple and quick Installation with no special knowledge or tools required

Smart View

Handheld and cloud-based analytics options

Versatile Use

Ideal for refuse, steel, agriculture, asphalt, aggregates, forest products, and more.

Smart Scale Owner Operator & Fleet Onboard Truck Scales

Our truck scales are designed to be self installed. We provide solutions for air suspension, mechanical suspensions including straight axle, leaf spring, walking beam, haulmax etc. Typical error is .5% on air suspension and 1-1/2 to 2% on mechanical suspensions.

Strain Gauge

An easy-to-install strain-gauge-based mechanical solution for spring suspensions that gives more durability and accuracy in measuring payload in all weather conditions.

SG-1

SG-2

Durable

Waterproof-shock-resistant, corrosion-free sensors with 2-year warranty

Transferable

Move calibration data seamlessly from truck to truck

Long Range

Reliable monitoring up to 500 ft (155 m)

Easy Setup

Install in minutes – no special tools needed

Smart View

Handheld and cloud-based analytics options

Versatile Use

Ideal for fleets, mining, agriculture, and more

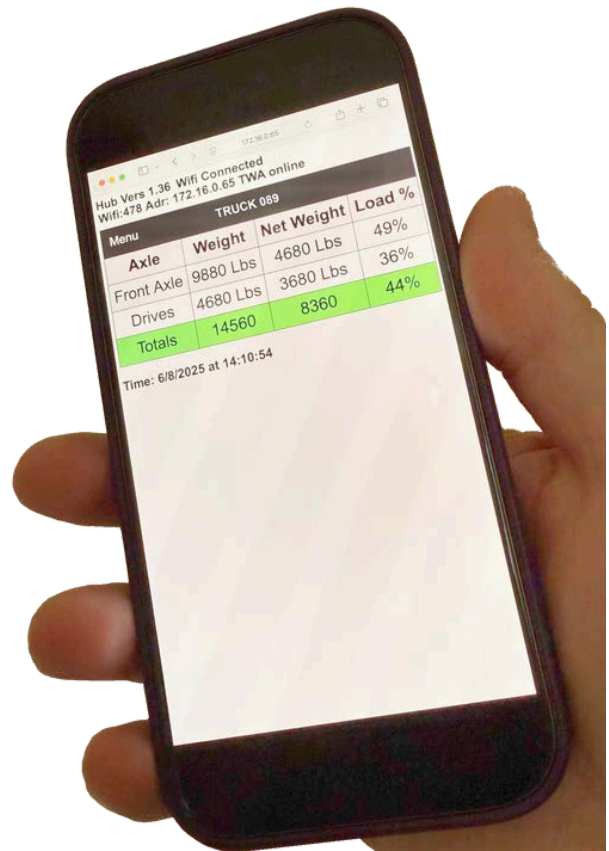

Smart Scale Owner Operator & Fleet Onboard Truck Scales

Our latest generation of onboard truck scale gives you more display choices and subsequently more price choices. you can use our fixed display that is available as a battery powered handheld display or hard powered from the truck power.

You can as well use your IOS or Android Smart Phone or Tablet as the display using the Wireless Hub. There is no need to download an app to view the load data.

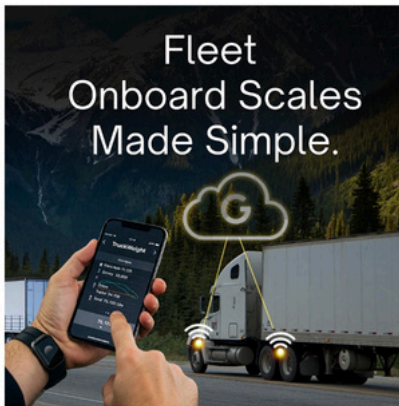

Smart Scale Owner Operator & Fleet Onboard Truck Scales

Fleet Management

Maximize return on your scale investments and save time with efficient management of a large fleet by reducing unnecessary coordination time between driver, back office & maintenance with the help of our cutting-edge analytics solution that enables storing, sharing, verifying and analyzing weight data using IOT

Smart IoT

Connected, real-time weight data powered by IoT technology

High ROI

Save time and money by reducing coordination between drivers and back office

Reliable Gateway

Collect and sync data from multiple sites

Google-Backed

Built on Google Firebase for reliability and speed

Peace of Mind

Manage multiple trucks and sensors from one place

Low Cost

No monthly data fees or hidden costs
